Tombstone Troubles. A contributor to the Citizen from Tombstone, under the above caption, publishes an article in that paper on the 22d instant and signs himself "Union." The article contains so many facts that we regret having to offer a correction. Union berates the county officials, and the producing mines before the public as a set of swindlers-declares that the mines are living off the camp, and that not a single mine is assessed anywhere near its value, while private property is assessed beyond its value. He also says the Democratic officials have now the chief city of the county in their control; etc. Then he goes on to enumerate the frauds of said officials. The frauds are all right; but, my dear friend Union, let me correct you. Progress Made in One Month After the Great Fire.

One month ago yesterday the fire fiend desolated Tombstone. The heart of the city was burned out, business prostrated and enterprise blocked. We can now even, imagine the flames speeding across Allen street, and the firemen making their gallant stand at Joyce's corner. It was impossible to witness the awful scene without being impressed with the savage grandeur. Who that heard the screaming of women, that witnessed the trembling of men, and saw the larid flames spreading havoe and destruction on that dreadful day could believe that Tombstone was pos sessed of such Roman firmness, as to be again rebuilt one month after? Who, that witnessed the wholesale destruction of property, that saw valuable goods piled on the street at the mercy of the vagabond, that saw the aimless, almost desperate look on men's faces, and the silent tear laving beeks of women, could suppose that

I understand from your note that my claim for services on the Grand Jury was not allowed by the Supervisors. Now, this is certainly a very singular proceeding. The published report

You also wrote me that it had been allowed, and wished me to accept \$56.10 for it, which I refused to do.
